

Select **New Project** to open the New Project dialog and start designing a project from scratch.

# Step-by-Step Projects

1 2 3

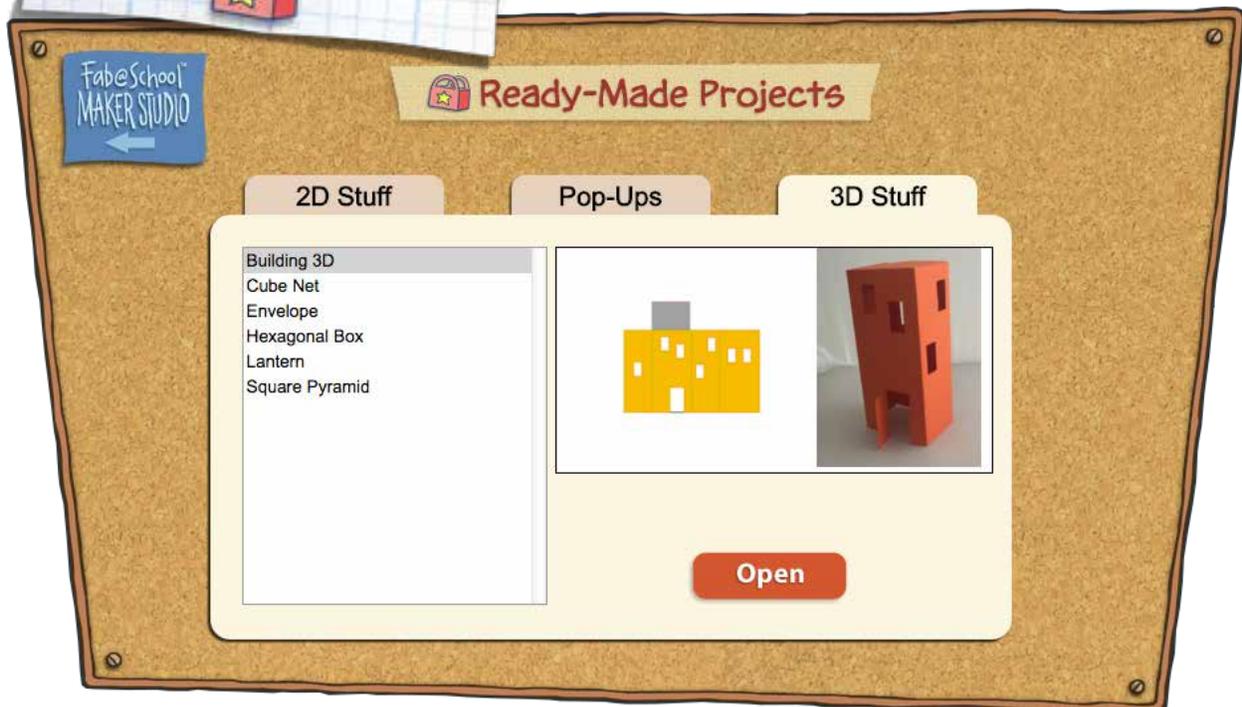

Select **Step-by-Step Projects** to get started with quick and easy Step-by-Step Projects. Select a tab to choose 2D Stuff, Pop-Ups, or 3D Stuff. Select a project and then select Open. The selected activity will open in the Edit Screen.

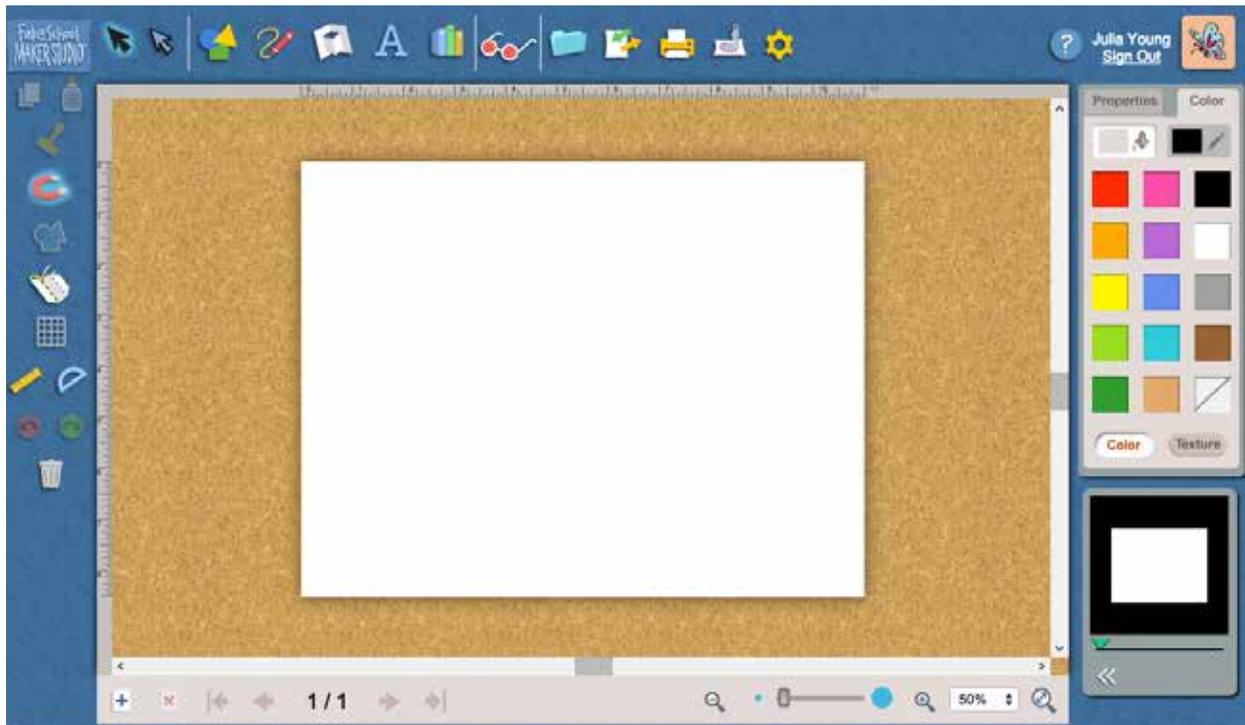

# Ready-Made Projects

Select **Ready-Made Projects** to jump right in and start fabricating. Select the tab for 2D Stuff, Pop-Ups, or 3D Stuff. Then select a project and Open. The Ready-Made Project will open in the Edit Screen. Create the project as is or modify the design to create something new.

# Edit Screen Tools

- |   |  |   |   |
|---|--|---|---|
|    | <b>Select</b><br>Select an object                          |    | <b>Home</b><br>Return to the Main Menu                    |
|    | <b>Edit</b><br>Edit an object                              |    | <b>Copy</b><br>Save a copy to memory                      |
|  | <b>Shapes</b><br>Click or Drag a shape into the project    |  | <b>Paste</b><br>Paste a copy from memory                  |
|  | <b>Lines</b><br>Draw straight or curvy lines               |  | <b>Stamp Tools</b><br>Stamp multiple copies of an object  |
|  | <b>Pop-ups</b><br>Choose fold lines and ready-made pop-ups |  | <b>Magnetize</b><br>Snap objects together                 |
|  | <b>Text</b><br>Add text to an object                       |  | <b>Weld Tool</b><br>Weld shapes together                  |
|  | <b>Library</b><br>Open image library                       |  | <b>Cut, Fold, Tab</b><br>Add cut and fold lines, and tabs |
|  | <b>X-Ray</b><br>View cut and fold lines                    |  | <b>Grid</b><br>Places a grid into the project             |
|  | <b>File</b><br>Open and save project files                 |  | <b>Ruler</b><br>Places a ruler into the project           |
